

Ankit Jha

reachankitjha@gmail.com — +91-8595519253 — Portfolio — GitHub — LinkedIn

Education

Maharaja Surajmal Institute of Technology, New Delhi
Bachelor of Technology in Information Technology
CGPA: 9.5/10

2025 – 2029 (*Expected*)

Technical Skills

Programming Languages: Python, C++, C, JavaScript

Web & Backend: FastAPI, HTML, CSS, REST APIs

Data & AI: NumPy, Pandas, Scikit-Learn, TF-IDF, LLM Integration, SQLite

Developer Tools: Git, GitHub, VS Code, PyCharm

Concepts: Information Retrieval, Prompt Engineering, OOP, Data Structures & Algorithms

Projects

AI Research Paper Analyzer

GitHub

- Designed a modular FastAPI backend with service-based architecture for PDF ingestion and LLM-driven processing
- Implemented a document chunking pipeline and integrated Groq API for automated summarization and flashcard generation
- Applied prompt engineering techniques to improve output quality; built an end-to-end interactive frontend in HTML/CSS/JS

TF-IDF Based Search Engine

GitHub

- Built an information retrieval system from scratch using TF-IDF scoring, inverted indexing, and a BFS-based web crawler
- Stored document corpus and index metadata in SQLite; exposed ranked query results via a CLI interface

ML Library (From Scratch)

GitHub

- Implemented Linear Regression, Logistic Regression, and K-Nearest Neighbors in NumPy without ML frameworks
- Built custom gradient descent, loss functions, and evaluation metrics with a sklearn-style modular API

Competitive Programming

LeetCode: KaunAnkit — 50+ problems solved (Arrays, Two Pointers, Sliding Window, Stack, Binary Search)
